Co

Editors-in-Chief

Dr. Antonio García Martínez
Polytechnic University of Valencia, Valencia, Spain
Internal Combustion Engines, Combustion, Efficiency, Emissions

Professor Suresh C. Pillai
Institute of Technology Sligo, Sligo, Ireland
Nanotechnology, Energy Materials, Supercapacitors, Photocatalysis, Electronic Materials, Advanced Functional Materials, Engineering Materials and Ceramics

Dr. Norman Toy
Engineering & Scientific Innovations Inc, Fairfield, Ohio, United States of America
Aerospace Engineering, Experimental Fluid Mechanics, Heat Transfer, Bluff Body Aerodynamics, Flow Visualization & Image Processing, Electronic Instrumentation for Fluid Measurements, High Speed Aerodynamics, Fluid Structure Interaction
Associate Editors

Dr. Amer A. Amer
Saudi Aramco, Dhahran, Saudi Arabia
ICE Technologies, Fuel/Engine Interactions, Combustion Modes, Low Temperature Combustion, Engine and Vehicle Modeling, Engine and Spray Laser Diagnostics, Life Cycle Analysis, Computational Fluid Dynamics, Fuel Formulation, Fuel Kinetics, Gasoline Engines, Diesel Engines, Mobile Carbon Capture, Synthetic Fuels, Technoeconomics, Zero Emission vehicles

Dr. Seyed Ghaffar
Brunel University College of Engineering Design and Physical Sciences, Uxbridge, United Kingdom
Construction Materials, Materials Science, Sustainable material development, Bio-based building products, Bio-based materials, 3D printing of Concrete, Additive manufacturing technology, Concrete technology, Low carbon concrete, Bio-composites, Natural fibres reinforced concrete, Biomass and bioenergy

Dr. Juan Jose Hernández
University of Castilla-La Mancha, Ciudad Real, Spain
Combustion, Biofuels, Diesel engines, Pollutant emissions

Dr. Martin Herreros
University of Birmingham, Birmingham, United Kingdom
Aftertreatment, Emissions, Fuels, Hydrogen, Particulate matter

Dr. Soledad Le Clainche
Universidad Politécnica de Madrid (UPM), School of Aerospace Engineering, Madrid, Spain

Data-driven methods, Reduced order models, Modal decompositions, Flow patterns, Global instability, Machine learning, Soft computing, Complex flows, Non-linear dynamical systems

Dr. Ezio Mancaruso

National Research Council Institute of Science and Technology for Sustainable Energy and Mobility, Napoli, Italy

Optical diagnostics, In-cylinder combustion, Exhaust after treatment system, Engine fuel interaction, Hybrid vehicles, Sustainable mobility

Dr. Daniel Mulvihill

University of Glasgow James Watt School of Engineering, Glasgow, United Kingdom

Mechanical Engineering, Materials Engineering, Solid Mechanics, Tribology, Experimental Mechanics, Energy Harvesters, Triboelectricity, Flexoelectricity, Friction, Wear, Composite Materials, Contact Mechanics, Metal Alloys

Dr. Ricardo Vinuesa

Royal Institute of Technology, Stockholm, Sweden

Turbulence, Numerical simulation, Turbulent boundary layers, DNS, Machine learning, Sustainability

Dr. Shouliang Yi

National Energy Technology Laboratory, Pittsburgh, Pennsylvania, United States of America

Fundamental and applied research related to advanced membranes and sorbents for molecular separations including natural gas separation, CO₂ capture, hydrocarbon separations, and water desalination

Prof. Dr. Yanxiang Zhang

Harbin Institute of Technology, Harbin, China

Ceramic Fuel Cells and Electrolyzers, Electrochemistry, Solid State Ionics, Continuum Modeling, Thermochemical Treatment, Surface Engineering

Social Media Editor

Dr. Shouliang Yi

National Energy Technology Laboratory, Pittsburgh, Pennsylvania, United States of America

Fundamental and applied research related to advanced membranes and sorbents for molecular separations including natural gas separation, CO₂ capture, hydrocarbon separations, and water desalination

Editorial Board

Prof. Dr. Francisco Martínez Álvarez

University of Seville, Sevilla, Spain

Time series prediction, data science and big data analytics

Professor Quan-Fu An

Beijing University of Technology, Department of Environmental and Chemical Engineering, Beijing, China

Synthesis of polyelectrolyte complex (PEC) nanoparticles for membrane fabrication, Utilization of novel nanoparticles, e.g., GO, CNT, and MOF, to tailor membrane nanostructures, Nanoporous polymer membrane development, Separation membrane manufacture and membrane process, including pervaporation, nanofiltration, microfiltration, gas separation, and so on, Two-dimensional membrane fabrication for precision molecule separation, like GO membrane , ,

Professor Jose M. Chicharro

University of Castilla-La Mancha, Ciudad Real, Spain

Metrology, Vibrations, Pneumatic suspensions, and Vehicle dynamics

Dr. Philip Collins

Brunel University London, Uxbridge, United Kingdom

Geotechnical Engineering, Site investigation, Soil deformation, Earthquakes, Freeze-thaw, Saline soils, Ground models

Assist. Prof. Suranga Dharmarathne

University of Indianapolis, Indianapolis, Indiana, United States of America

Computational fluid dynamics, numerical simulations, flow control, and wind energy

Dr. Dionysios Dionysiou

University of Cincinnati, Cincinnati, Ohio, United States of America

His expertise and research interests include (i) physical chemical processes for water treatment and water reuse, (ii) advanced oxidation processes, including UV and solar light-based remediation processes, (iii) treatment of contaminants of emerging concern (i.e., PFAS, pharmaceuticals and personal care products, biotoxins, heavy metals, microplastics/nanoplastics), (iv) remediation of Harmful Algal Blooms/cyanotoxins, (v) environmental nanotechnology, environmental catalysis, and nanosensing, and (vi) water-energy-food (WEF) nexus and water sustainability.

Professor Yingchao Dong

Dalian University of Technology School of Environmental Science and Technology, Dalian, China

Environmental engineering, Membrane technology, Inorganic ceramic-based membranes, Waste/mineral recycling, Water and wastewater treatment, Membrane process, Resource and energy recovery.

Professor Yiqun Fan

Nanjing University of Science and Technology School of Chemical Engineering, Nanjing, China

Membrane separation, Ceramic membrane

Dr. Mohammad Heidarzadeh
Brunel University London, Uxbridge, United Kingdom
Coastal Engineering, Tsunami, Earthquake, Storm surge, Landslide

Dr. Wei Huang
Nanyang Technological University, Singapore, Singapore
Shape memory materials, Shape memory technology, Shape memory alloys, Shape memory polymers, Additive manufacturing

Professor Yi Huang
The University of Edinburgh Institute for Materials and Processes, Edinburgh, United Kingdom
Graphene/Graphene Oxide, 2D MOFs/Zeolites/MXenes, Membrane Separation, Carbon Capture, Water Treatment &, Desalination

Dr. Raja Rizwan Hussain
King Saud University Civil Engineering Department, Riyadh, Saudi Arabia
Concrete Technology - Materials and Structures, especially Corrosion

Dr. Katherine Hyde
University of Reading, Reading, United Kingdom
Architecture, Construction, Energy, Environmental Engineering

Dr. Sreenivas Jayanti
Indian Institute of Technology Madras Department of Chemical Engineering, Chennai, India
Flow batteries, fuel cells, carbon capture and sequestration, computational fluid dynamics

Professor Jingkun Jiang
Tsinghua University School of Environment, Beijing, China
Air pollution and control, Aerosol Science and Technology, Environmental Monitoring

Dr. Antonios Kanellopoulos
University of Hertfordshire, Hatfield, United Kingdom
2D materials and Civil Infrastructure, Nano-technology in cement-based composites, Digital fabrication and 3D printing in construction, Self-healing materials, Self-sensing materials, Early age cracking in cement-based materials, Sustainable cements and concretes, UHPFRCCs, High durability concretes

Prof. Dr. Paulo A. F. Martins
University of Lisbon Higher Technical Institute, Lisboa, Portugal
Numerical and experimental analysis of forming and joining by forming processes, Workability and process design in forming and joining by forming processes, Manufacturing processes.

Assoc. Professor Javier Monsalve Serrano
Polytechnic University of Valencia, Valencia, Spain
Internal Combustion Engines, Combustion fundamentals, Pollutant emissions,
Advanced combustion modes, Hybrid powertrains

Professor Tatiana Morosuk
Technical University of Berlin, Berlin, Germany
Exergy-based methods, Advanced exergy-based methods, Refrigeration, Cryogenics,
Power generation, Optimization

Dr. Rustam Mullyadzhyanov
Institute of Thermophysics SB RAS, Laboratory for Fundamentals of Energy
Technologies, Novosibirsk, Russian Federation
Turbulence, Numerical Simulation, Hydrodynamic Stability, Solitons, Nonlinear Waves

Dr. Behzad Nematollahi
Swinburne University of Technology, Hawthorn, Victoria, Australia
3D Concrete Printing, Geopolymer Concrete, Strain-Hardening Cementitious
Composites (SHCC), Ultra-High Performance Concrete (UHPC), Sustainable
Construction Materials

Professor Gerald Nurick
University of Cape Town, Cape Town, South Africa
Impact and Blast Dynamics, Crashworthiness, Material Properties at High Strain Rates,
Metals and Composites, Bio-engineering of Human Response and Survivability, Impact
on Sports Equipment, and Comminution (Crushing of Ore Products)

Professor Biranchi Panda
Indian Institute of Technology Guwahati Department of Mechanical Engineering, North
Guwahati, India
Additive manufacturing, sustainable materials, cellular structures, process modelling
and optimization

Professor Mike Riley
Liverpool John Moores University, Liverpool, United Kingdom
Engineering Business, Management and Accounting, Materials Science, Environmental
Science

Professor Daniel Rittel
Technion Israel Institute of Technology Faculty of Mechanical Engineering, Haifa, Israel
Expertise- Dynamic mechanical behavior of materials, Thermomechanical coupling in
solids, Static and dynamic fracture, Stress waves in solids, Electron microscopy, Soft
matter mechanics

Assoc. Professor Pedro Roncero
University of Castilla-La Mancha, Ciudad Real, Spain
Control of electronic power converters, Power quality, Energy storage systems

Dr. Peter Kelly Senecal

Convergent Science Inc, Madison, Wisconsin, United States of America

Computational Fluid Dynamics, Modeling And Simulation, Mechanical Engineering,
Fluid Dynamics, Combustion, Combustion Optimization

Professor Igor Sevostianov

New Mexico State University, Las Cruces, New Mexico, United States of America

Micromechanics, Composites, Biomechanics, Effective properties

Professor Chuyang Tang

The University of Hong Kong Department of Civil Engineering, Hong Kong, Hong Kong

Membrane separation, Desalination, Water reuse, Environmental nanotechnology,
Energy-water nexus

Dr. Erman A. Tekkaya

TU Dortmund University Institute of Forming Technology and Lightweight Components,
Dortmund, Germany

Metal Forming, Plasticity, Material Characterisation, Manufacturing, Mechanics

Professor Meiping Tong

Peking University College of Environmental Science and Engineering, Beijing, China

Transport of nanoparticles, bacteria, microplastics in natural and engineered
systems, Heteroaggregation of colloids, Toxicity of nanomaterials, Bacterial
disinfection, Organic pollutant degradation, Heavy metal removal.

Assist. Prof. Laura Villafane

University of Illinois Urbana-Champaign Department of Aerospace Engineering, Urbana,
Illinois, United States of America

Particle-laden flows, Turbulent flows, Heat transfer, Experimental techniques, Optical
diagnostics

Professor Yinhua Wan

Institute of Process Engineering Chinese Academy of Sciences, Beijing, China

Bioseparation, Carbon capture and utilization, Desalination, Wastewater treatment and
reuse, Resources recovery, Nanofiltration, Reverse osmosis

Professor Huanting Wang

Monash University, Department of Chemical and Biological Engineering, Melbourne,
Victoria, Australia

Nanocomposite membrane, Molecular separation, Water desalination and purification,
Ion transport and separation, Electrochemical Energy

Dr. Ranil Wickramasinghe

University of Arkansas, Ralph E. Martin Department of Chemical Engineering,
Fayetteville, Arkansas, United States of America

Membrane separations, Bioseparations, Water treatment, Membrane surface modification, Responsive membranes, Catalytic membranes

Dr. Zongli Xie

CSIRO Australian Manufacturing and Materials Precinct, Clayton, Australia
Desalination, Wastewater treatment, Mixed matrix membranes, Membrane distillation, Pervaporation, Forward osmosis, Environmental catalysis, Vent gas treatment.

Dr. Tiemin Xuan

Jiangsu University, Zhenjiang, China
Internal combustion engines. Optical diagnostics on spray and combustion

Professor Mustafa Yavuz

University of Waterloo Department of Mechanical and Mechatronics Engineering,
Waterloo, Ontario, Canada
NEMS, MEMS, Quantum electronic solids

Professor Xiwang Zhang

Monash University, Department of Chemical and Biological Engineering, Melbourne,
Victoria, Australia
Membrane Synthesis, Membrane Process, 2D materials, Nanoporous
Materials, Catalytic Oxidation and Resource Recovery, Advanced Oxidation
Technologies, Energy-efficient separation

Professor Yatao Zhang

Zhengzhou University, School of Chemical Engineering, Zhengzhou, Henan, China
Mixed Matrix Membranes, Gas Separation, Carbon Capture, Nanofiltration, Water
Treatment, Antibacterial Membrane

Dr. Yongling Zhao

ETH Zurich, Zurich, Switzerland
Multiscale buoyant flows, Laser diagnostics techniques, Computational fluid dynamics,
Heatwaves and Urban heat island
