The halal lifestyle has positive implications to increase halal products in the business aspect. Despite having the largest Muslim population of any country, Indonesia's halal products only account for about 3.8 per cent of the global halal market, which was valued at US\$2.2 trillion in 2018 and is projected to reach \$3.2 trillion in 2024. To increase public awareness of the halal lifestyle, The Halal Product Assurance law No.13/2014 came into effect in October 2019 and requires a mandatory halal certification for all halal products. This has led to significant growth in the halal food, pharma, and cosmetics sectors and is a trend that is expected to continue. The National Committee for Sharia Economy and Finance (KNEKS) was also formed in early 2020 to increase the development of the Islamic economic and financial ecosystem and to turn Indonesia into the World's Halal Center. A mutual relationship has yet been done effectively among stakeholders in the halal lifestyle industry for its halal lifestyle messaging development. This study examines this phenomenon's potential magnitude and its mechanisms undertaken by Government Public Relations of halal lifestyle during Covid-19</p>

- The increasing public awareness of the halal lifestyle during the COVID-19 pandemic has provided space for public institutions to support halal product guarantee services. In this condition, it is necessary to strengthen the government's public relations by exploring and developing halal lifestyle messages during the pandemic. This is where the policy communication regarding the guarantee of halal products and the existence of the implementing institutions and their services is continuously informed to the public by exploring and formulating communication process carried out by government public relations in disseminating the importance of a halal lifestyle during a pandemic.
