patients
disorders during recovery
process

Holistic Nursing Services

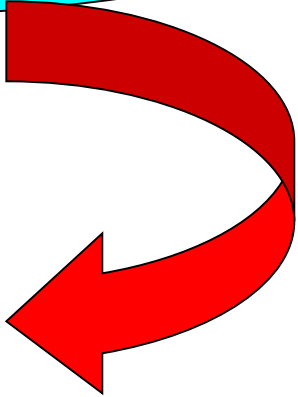

Biological

Psychological

Social

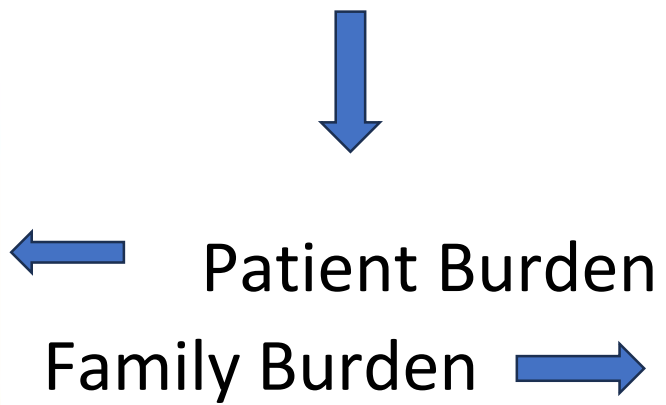

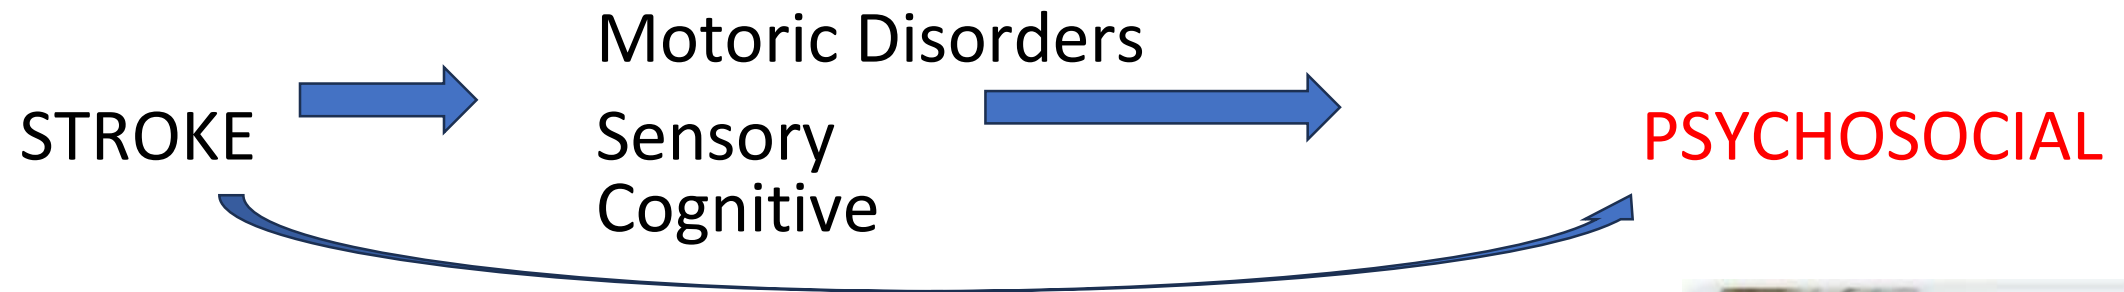

Cultural

Spiritual

How Stroke caused psychological problem

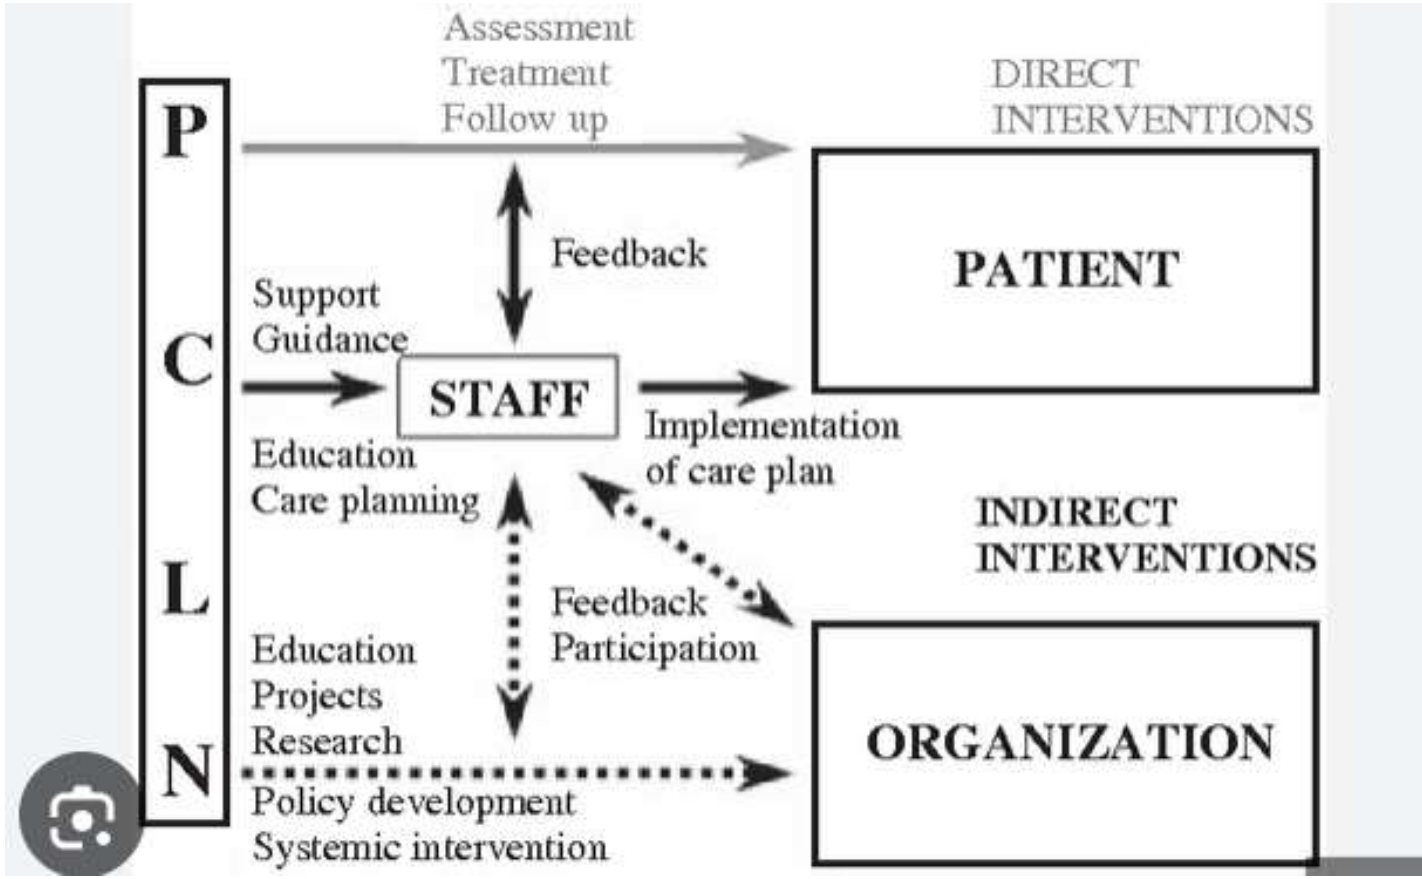

PCLN (Psychiatric Consultation-Liaison Nursing)

- The nursing field focuses on patients and families resulting from physical illnesses experienced in public hospitals.
- nurse as a consultant and liaison in the context of mental health in a physical health care environment.

Psychiatric Consultation-Liaison Nursing (PCLN)

The purpose Of Psychiatric Consultation-Liaison Nursing (PCLN)

1. General

Integrate mental health care with general medical care for patients experiencing mental or emotional health problems and other medical conditions.

2. Specific

- ✓ easy access to mental care
- ✓ early assessment and intervention
- ✓ Symptom management
- ✓ multidisciplinary Collaboration
- ✓ improved quality of life

1. Psychosocial In Stroke Patients

1. Assessment
2. Diagnosis
 - a. Anxiety
 - b. self concept
 - c. grief
 - d. Helpless
 - e. Desperate
3. intervention
4. Implementation
5. Evaluation

Family Psychosocial In Caring For Stroke patient

Families experience psychosocial problems caused by physical illnesses from family members with stroke

1. Assessment
2. Diagnosis
3. Intervensi
4. Implementasi
5. Evaluation

Case study

interview some family members of stroke patients hospitalized in public hospital. Generally, family said patients are afraid of death. **the high cost of treatment collapse family economy, especially if the patient is the husband.** wife focused on husband's treatment. it results children are left alone or with someone from extended family.

case analyst

1. family experience anxiety
2. situation faced by family member :
 - a. Patients' treatment
 - b. abandoned children or other family member
 - c. economy collapse
 - d. guilty feeling for neglecting the children / family

nursing diagnose

1. Anxiety

Nursing intervention

Family psychoeducation

It is a method used for family therapy with psychosocial problems due to physical illness. Such as economy collapse due to high-cost treatment.

Psychoeducational goals

- ✓ Train families to be able to express their feelings
- ✓ build family's knowledge concerning the disease and its treatment.
- ✓ Refunctioning patients' role

implementation

1. Assessment of problems experienced by family with experience of caring stroke family member
2. Treatment for patients with Stroke
3. anxiety management
4. Management burden
5. Limitation and family empowerment

NURSING EVALUATION

1. Anxiety resolved
